

Growth Engine breaks his maiden with ease at Gulfstream.

Last Race: 9/19/20 Alw-N3X @ MTH

Trainer: Chad Brown

Conditions Left: Alw-N3X, Stakes

Preferred Surface: Dirt

ANALYSIS

While Growth Engine is still **very lightly raced** for a 4-year-old, he's shown **exceptional talent in all seven on his starts, never missing the board** while posting three strong wins. Though he has a talented 3-year-old, he's **come back at 4 while showing all of the improvement that you'd expect an older horse to show**, notably upping his game on his Thoro-Graph sheet where he's **earned (0²) in 2 of his 3 starts this year (race replay)** showing he is more than capable of competing at the graded stakes level.

Growth Engine **debuted in January of his 3-year-old season, ultimately finishing 2nd to future G1 Woodward winner Global Campaign**. Growth Engine came back to break his maiden in his very next start, **beating 2 eventual stakes winners in the process**. Growth Engine **came back with a vengeance this year**, taking his pandemic-delayed 4-year-old debut by a **widening 4-3/4 lengths**. After running 3rd behind another stakes winner in Saratoga, Growth Engine **came back to take down a second-level allowance at MTH after having to go 4-wide around the turn**.

THORO-GRAPH

After running 3 consecutive (5)s as a 3-year-old, Growth Engine has taken his game to another level, posting two (0²)s in three starts. His sheet has an exceedingly similar pattern to that of Owendale who won a stake at Churchill and ran 2nd in the G2 Alysheba with a (0²). With the sort of improvement that Growth Engine has shown, he appears capable of moving into stakes/graded stakes company in the future.
